

Instructions for Installing Lackey CCG and the Mythos Plugin.

Outline.

Install Lackey, copy the Mythos data into the plugin folder... Run lackey and load the plugin.

Instructions

- 1). Download lackey from [L <https://lackeyccg.com/downloads.html>](https://lackeyccg.com/downloads.html)
- 2). Save the file somewhere suitable
- 3). You will need to extract the Lackey files from the Zip'd archive. For this you will need something like Win Zip.... 7 Zip is available here: <https://www.7-zip.org/download.html> and is open source (no fees).
- 4). Extract the Lackey files to a destination of your choice. Make sure you can remember where this is because you will need to return to it in a few minutes.
- 5). Navigate up 1 level from the plugins and find the LackeyCCG.exe file. Double Click it to start the program.

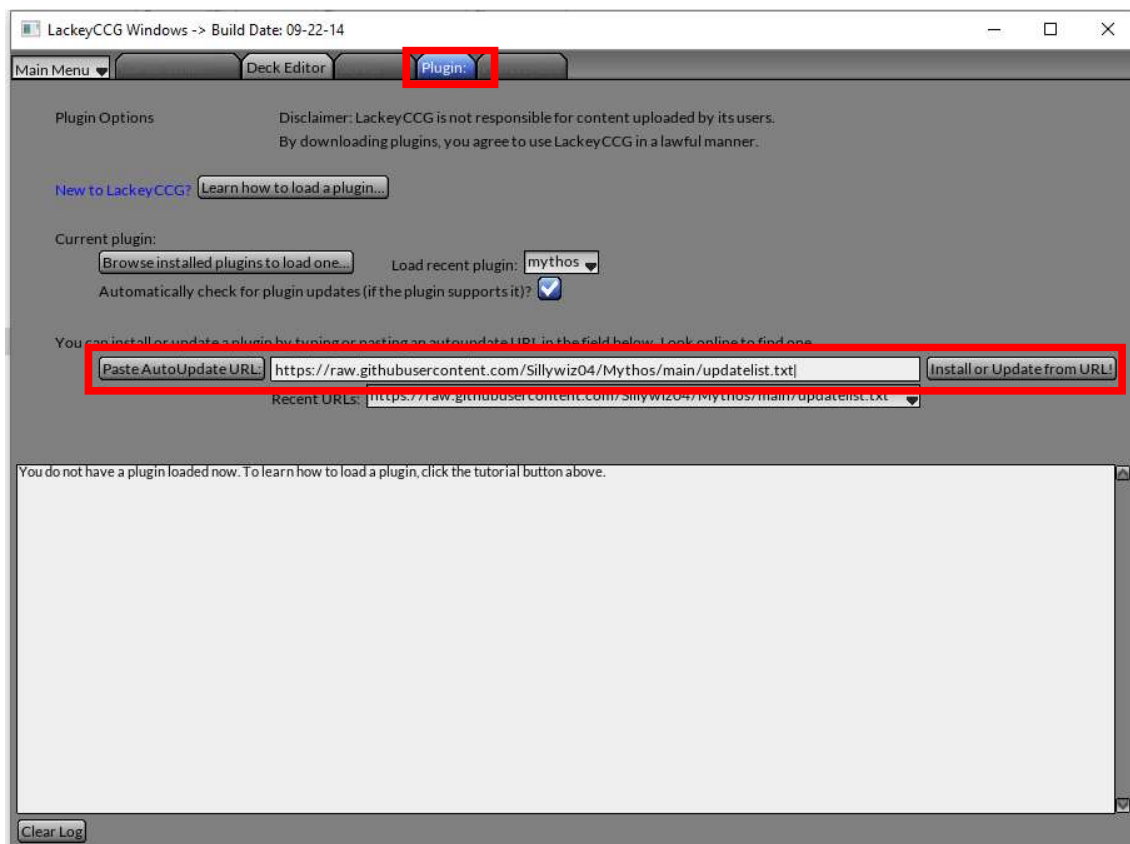

Lackey.Mythos > LackeyCCG.Test

6). This is the default Lackey system, and we need to load the Mythos plugin into it to configure it for play.

To do so select the Plugin Tab at the top.

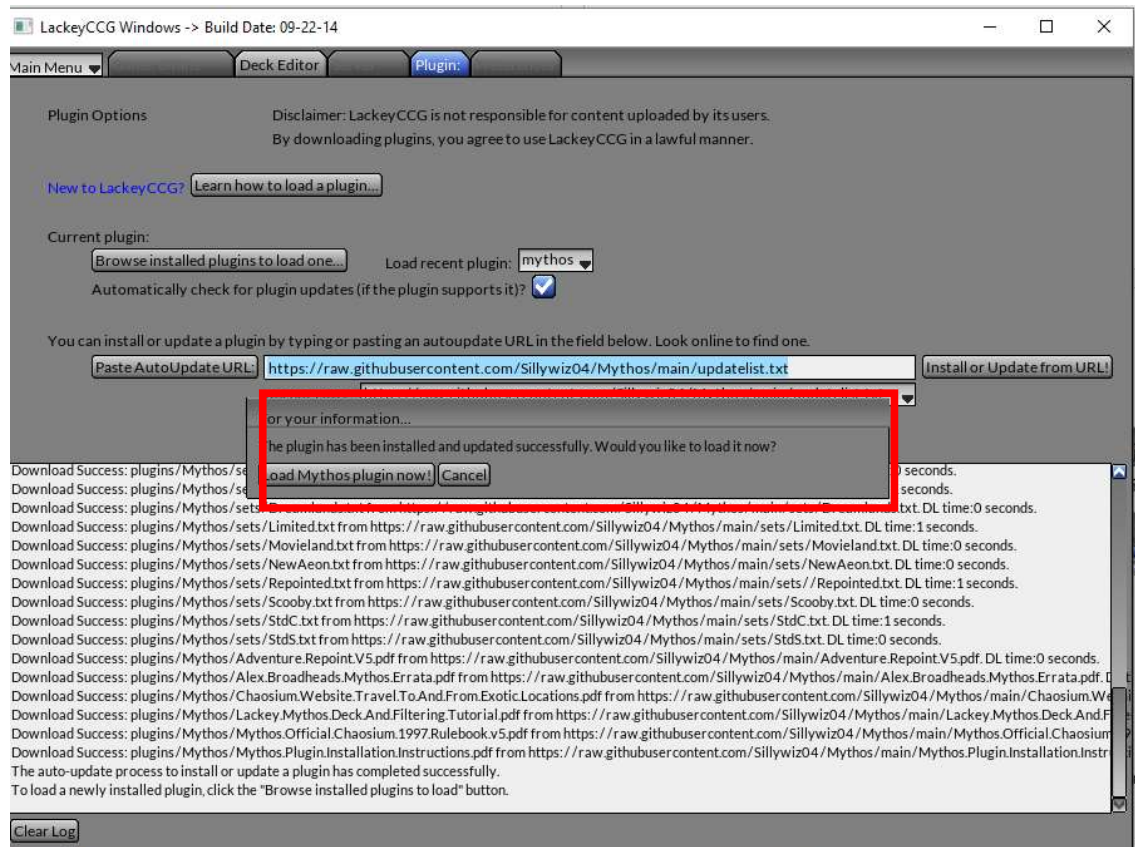

And in the Paste AutoUpdateURL Box copy and paste the following text and click on the Install or Update from URL Button

<https://raw.githubusercontent.com/Sillywiz04/Mythos/main/updatelist.txt>

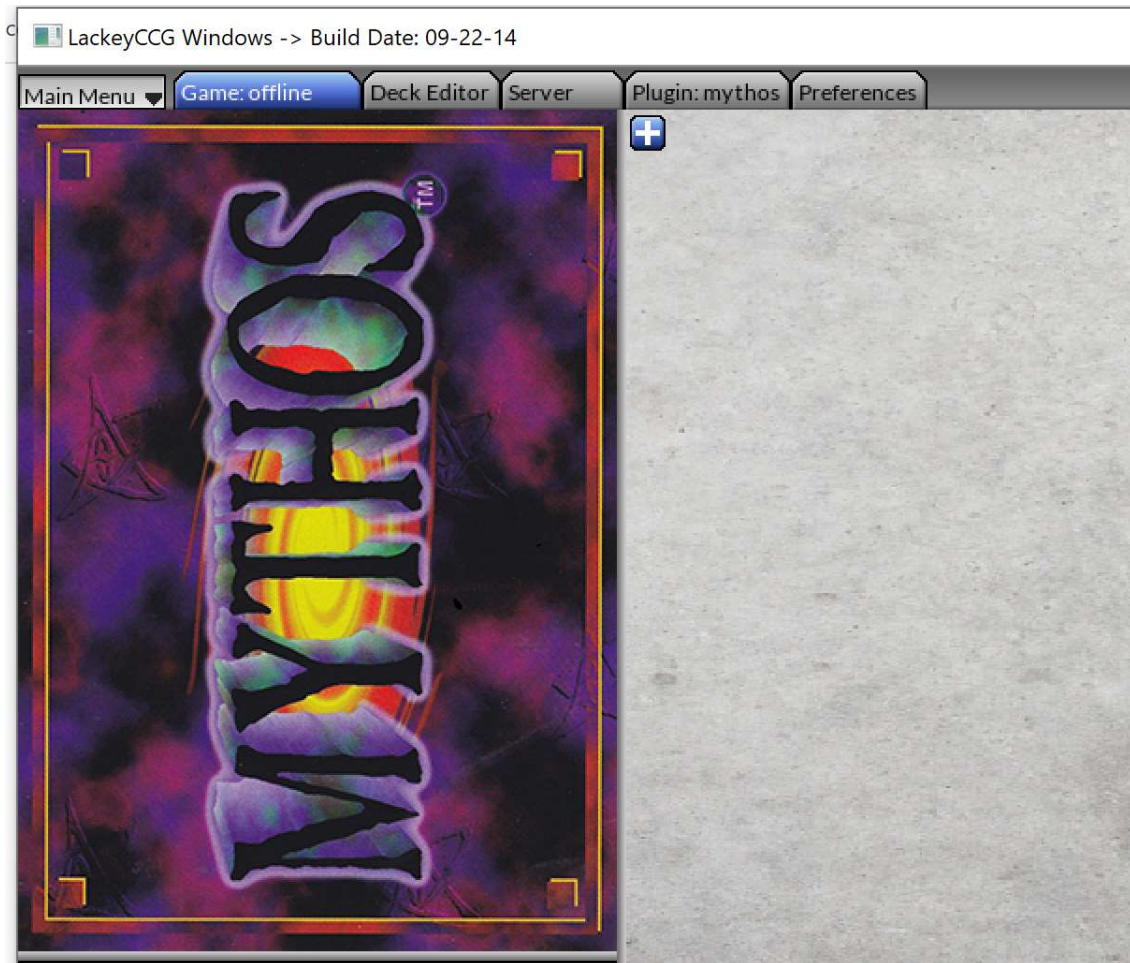

This will automatically download and install the files to play Mythos on Lackey. The images will automatically download in the background, so if they do not appear straight away please wait a few seconds.

7). Once complete you should be asked to restart the plugin.

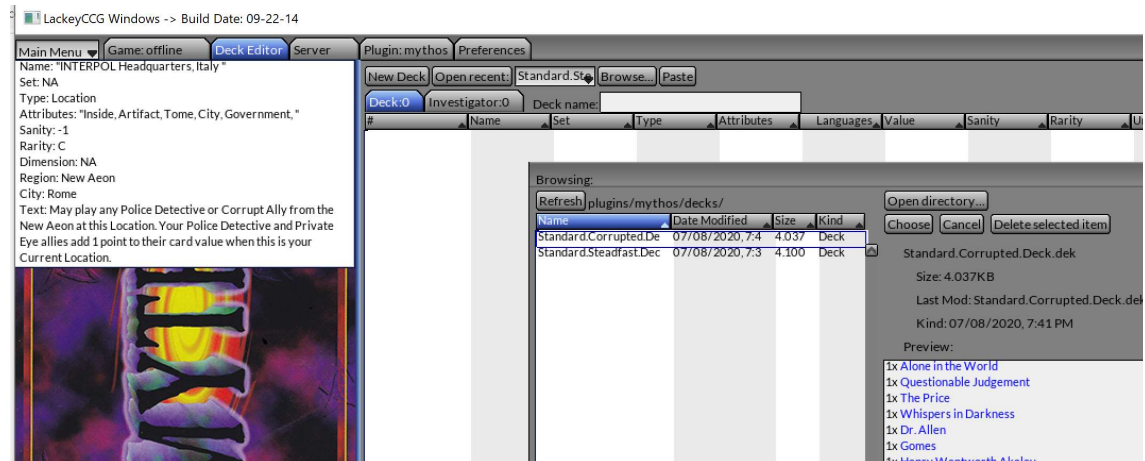

8).

Once loaded your screen should look like

10.) To load a deck, select the Deck Editor open at the top

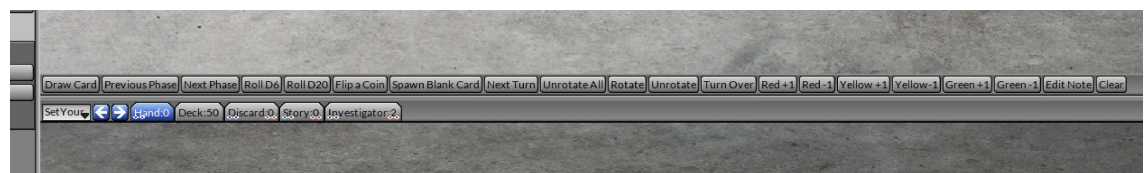

11). Select 'Browse' to look at the included decks. Select the one you want to play. Once selected Lackey gives you a list of the deck contents in the preview window. Once happy with your select, click the 'Choose' button and the deck is loaded into Lackey

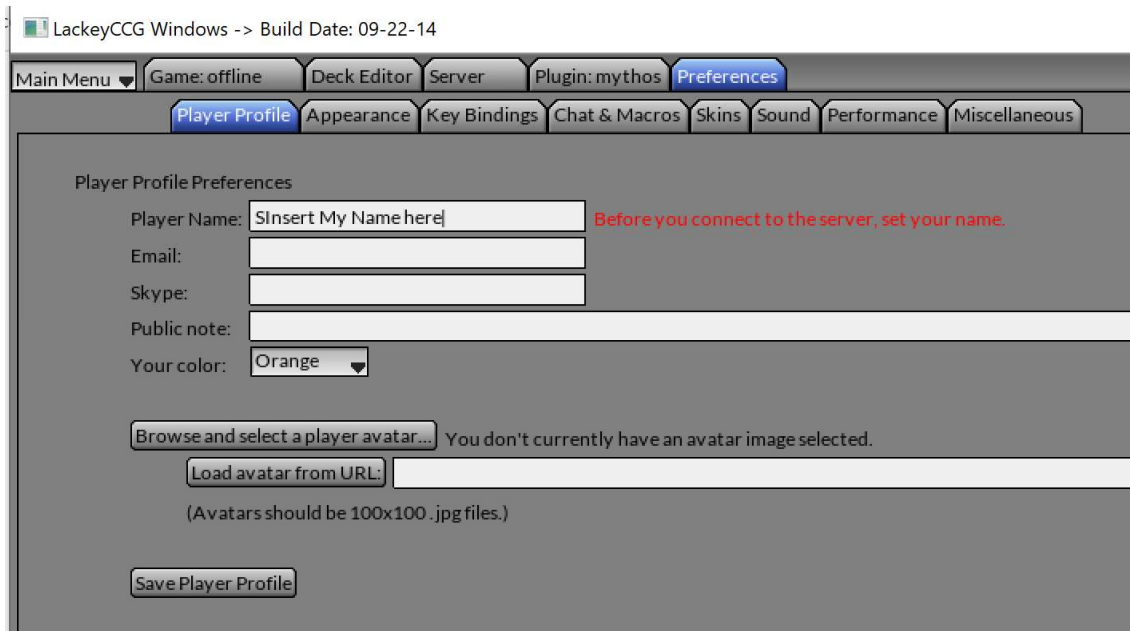

12). The easiest way to load a deck is to use the Load Entire Deck to you, button. Click it

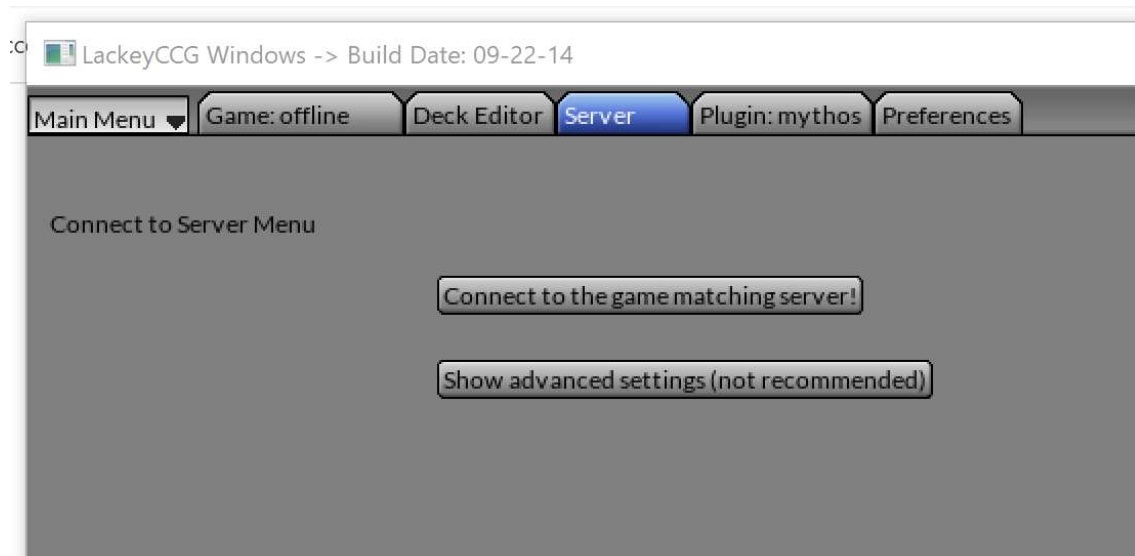

13). Lackey will load the deck and move to the playing area. Use the area and explore a number of options for the table selected. E.g Hand below. Clicking Draw, draws a card. Note there are decks discards, hand etc.. you can also drag and drop card to each of these tabs, or right click and select from the options available.

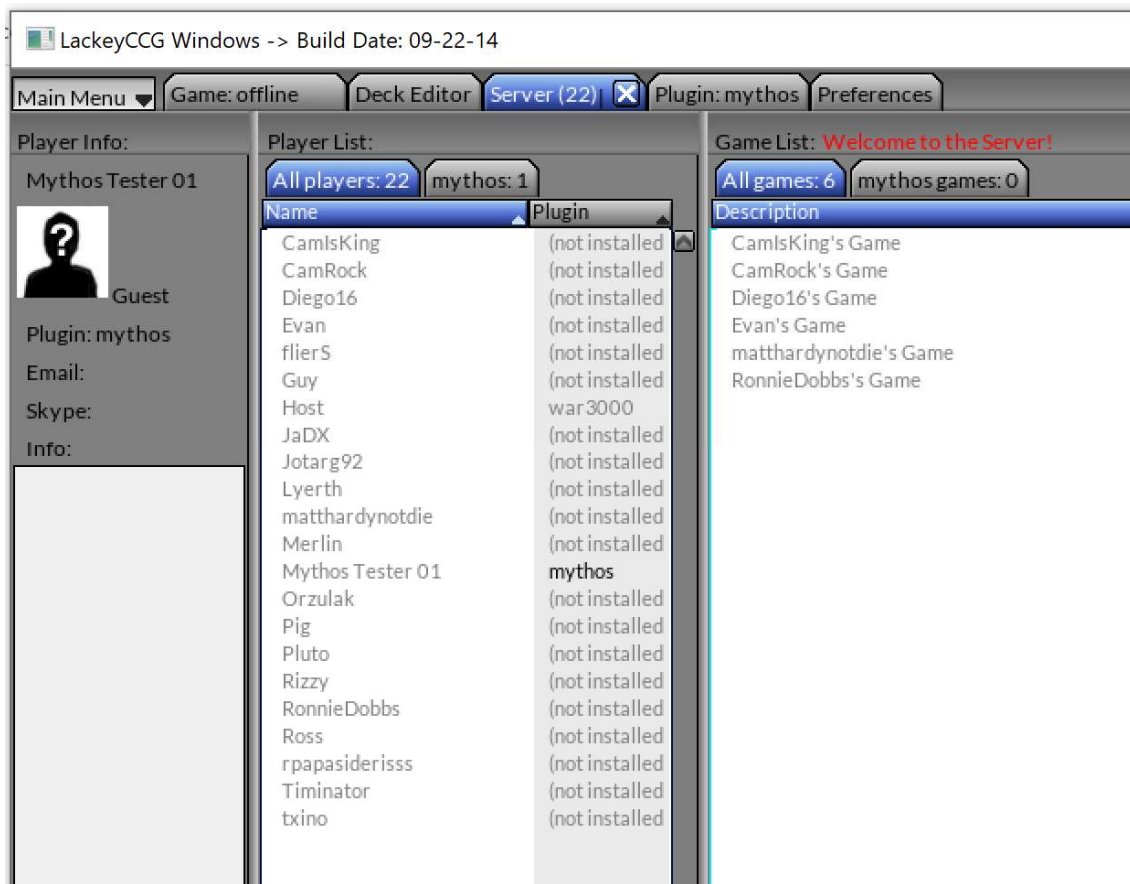

14). To join with another person to play a game, first select the preferences tab, and then complete the Player Name option. Once happy, save your profile.

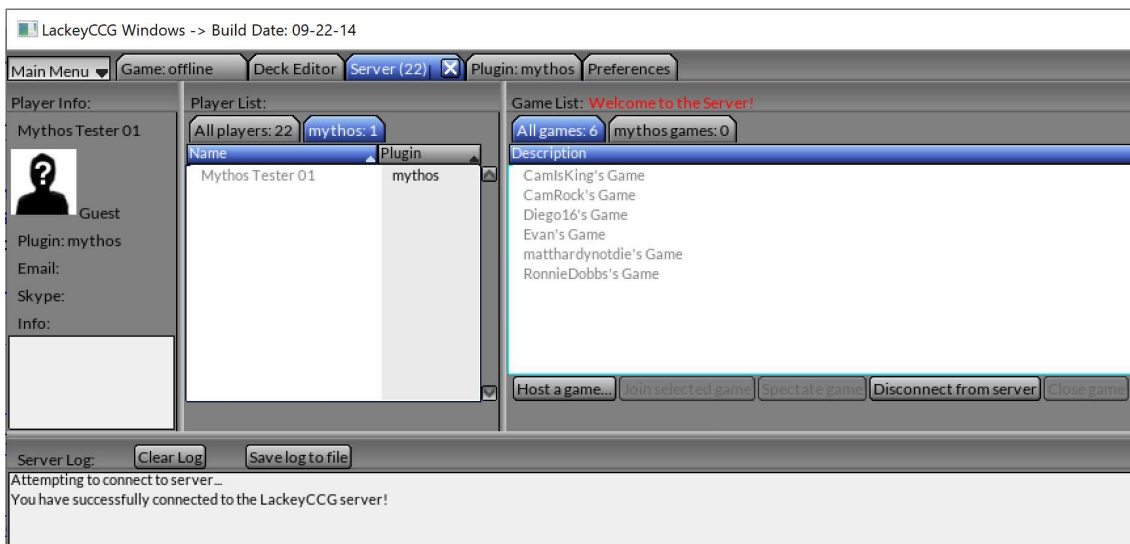

15). Select the Server Tab and then Connect to the game matching server!

16). Once connected your screen will show everyone connected to the server and the plugins they are currently using.

Only people with the same plugin can play the same game. Selecting the Plugin Name tab will filter out the players playing other games.

You can host a game using the button at the bottom. If someone is already hosting, you can use the Join Selected Game to play with them.

When you have finished remember to Disconnect From Server.

Notes

The Plugin details supplied include nearly all the cards available in the game. There are some monsters missing. Only the images for the investigators and the Standard Game set have been included.

Please let me know of any errors you find. This could be card text, image, visibility, lack of features within the game... whatever...

Voice Communications.

If you have a head set and microphone you can use this Discord (free) link to communicate with your opponent.
